Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 4 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Remove render-blocking JavaScript:

🔶 Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Leverage browser caching for the following cacheable resources:

96 / 100 User Experience

⚠ Consider Fixing:

Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. Size the page content to the viewport to provide a better user experience.

The page content is 420 CSS pixels wide, but the viewport is only 412 CSS pixels wide. The following elements fall outside the viewport:

- The element <div class="vc_column-inner">Сервисы Мобиль..., 2019prevnext</div> falls outside the viewport.

- The element <div class="vc_column-inner">Интернет-банки...т комментариев</div> falls outside the viewport.

- The element <div class="vc_column-inner">Карточки банко...т комментариев</div> falls outside the viewport.

- The element <div class="vc_column-inner">Полезная инфор...т комментариев</div> falls outside the viewport.

- The element <div class="vc_column-inner">Как положить/п...... Читать еще</div> falls outside the viewport.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

Mobile

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target Ангелина Якушева and 5 others are close to other tap targets.

- The tap target Контакты and 3 others are close to other tap targets.
