Consider Fixing:

Prioritize visible content

Mobile

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

52.3KiB of the HTML response was required to render the above-the-fold content. This requires 3 network round-trips. [Prioritize the above-the-fold content](#) so that it can be rendered with only the first 2 round-trips' worth of HTML.

- Only about 61% of the final above-the-fold content could be rendered with the HTML delivered within 2 round-trips.

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Consider Fixing:

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

52.3KiB of the HTML response was required to render the above-the-fold content. This requires 3 network round-trips. [Prioritize the above-the-fold content](#) so that it can be rendered with only the first 2 round-trips' worth of HTML.

- Only about 56% of the final above-the-fold content could be rendered with the HTML delivered within 2 round-trips.
