Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 19 blocking script resources and 18 blocking CSS resources. This causes a delay in

Mobile

rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 19 blocking script resources and 18 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.
