Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 3 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <https://ru-flebodia.ru/wp-includes/js/jquery/jquery.js?ver=1.12.4-wp>
- <https://ru-flebodia.ru/wp-includes/js/jquery/jquery-migrate.min.js?ver=1.4.1>

[Optimize CSS Delivery](#) of the following:

- <https://ru-flebodia.ru/wp-includes/css/dist/block-library/style.min.css?ver=5.3.2>

Mobile

- <https://fonts.googleapis.com/css?family=Roboto%3A400%2C400i%2C700&subset=cyrillic&ver=5.3.2>
- <https://ru-flebodia.ru/wp-content/themes/root/css/style.min.css?ver=2.1.2>

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- https://static.doubleclick.net/instream/ad_status.js (15 minutes)

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 737B (32% reduction).

- Minifying <https://ru-flebodia.ru/wp-content/themes/root/js/scripts.js?ver=2.1.2> could save 737B (32% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

Mobile

[Optimize the following images](#) to reduce their size by 40.8KiB (15% reduction).

- Compressing <https://ru-flebodia.ru/wp-content/uploads/2020/01/phlebodia-forma-vipuska-foto.jpg> could save 16.1KiB (13% reduction).
- Compressing <https://ru-flebodia.ru/wp-content/uploads/2020/01/tabletki-phlebodia-foto-1024x708.jpg> could save 15.3KiB (20% reduction).
- Compressing <https://ru-flebodia.ru/wp-content/uploads/2020/01/phlebodia-foto-s-tabletkami.jpg> could save 9.4KiB (13% reduction).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

86 / 100 User Experience

Should Fix:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `1...дства Флебодиа` and 27 others are close to other tap targets final.
- The tap target `1.1...ировка и нормы` and 12 others are close to other tap targets final.
- The tap target `` and 21 others are close to other tap targets.

4 Passed Rules

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

Configure the viewport

Mobile

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

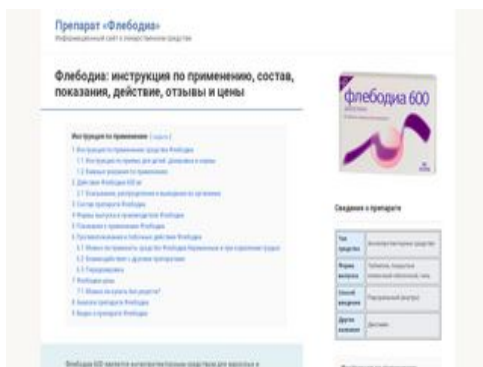

Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).
